

JUKI ELECTRIC TYPEWRITERS

The Features of the Leading Brand! These Juki electric typewriters were made for leading retailers across the country. Now they've been closed out, making them available at a **LOW liquidation price**. Because they were made for different retailers, they carry different brand names and come in different colors. We can't specify which color or brand name you'll receive, but all other features are identical.

"Ball" Element Typing. Just like the leading office brand, the Juki uses a single "ball" typing element. The 8-character ball elements are available in multiple styles, and can be purchased in most office supply stores. The Juki has the same convenient keyboard layout as the responsive 10 or 12 pitch. **50-Day C.O.M.** Mr. List . . .
